

# Risk Management Tool

Our platform offers a convenient risk assessment tool enabling instant evaluation of medical and logistical risks for individual employee travel plans.

As businesses reframe their future in today's evolving travel landscape, critical travel data and intelligence is essential to prioritising the safety of their employees. Now incorporating Covid-19 country restrictions into our travel tracking and pre-trip assessment technology, our solution now combines our standard tax, immigration and regulatory services alerts with travel risk management and data aggregation capabilities into a single, unified and leading offering.

## Covid-19 Alerts, Updates & Advice

International governments continue to advise on the application of travel or trade restrictions to countries experiencing COVID-19 outbreaks. To enable organisations to rise to this challenge, our complex rules engine provides an instant review of the medical and current logistical risks posed by the traveller's unique itinerary.

## Implement Travel Bans to specific locations

Implement a company-wide response strategy that includes travel restrictions to certain destinations, at pre-authorisation level.

## Locate travellers in specific location

Integrating our duty of care system without intruding on employees personal privacy, offering a level of insight into employees' location.

## Central Point of Contact

Our software acts as a central notification system, enabling prompt and transparent communication to alert recipients, where ever they maybe.

## Our Risk Assessment tool offers:

- Hassle-free risk assessment of itinerary and traveller profile
- Instant assessment on whether to carry out the proposed travel or not
- A detailed report outlining current logistical and medical risk factors
- Integration and customisation opportunities
- Convenient access via app or browser

# Example of Alerts

Behind the scenes, our teams of data analysts are closely monitoring government restrictions and logistical risk environments around the world from multiple sources. This ensures that the information driving our alerts is always up-to-date and representative of the pandemic's evolution, consolidated in a way which keeps things simple for our clients.

# Integration and Customisation

Our team will work with you to create one comprehensive solution, ensuring your Global Mobility system is truly integrated and extensible with other teams and vendors. Risk managers can become part of the approval process enabling them to track requests and manage traveller support services where required. We are also able to integrate travel policy rules, manager approvals, security information and global Covid-19 updates to ensure that travellers can transition through the risk assessment and approval process in one efficient visit.
